**RESPONSE TO NOTIFICATION OF MISSING
REQUIREMENTS and PETITION UNDER 37 C.F.R. § 1.47(a)**

Mail Stop Petition
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

This petition under the provisions of 37 C.F.R. §1.47(a) is submitted in response to the Notification of Missing Requirements Under 35 U.S.C. § 371 in the United States Designated/Elected Office (DO/EO/US) mailed on June 20, 2006 (copy enclosed).

The facts described below, attested to in the accompanying statements by Qin FU and Yongli REN, and evidenced in the documents submitted herewith, show that named coinventor Xin ZHANG is unavailable to execute the inventor's declaration for the above-identified patent application could not be reached after diligent effort.

"If a joint inventor refuses to join in an application for patent or cannot be found or reached after diligent effort, the application may be made by the other inventor on behalf of himself and the omitted inventor." 35 U.S.C. § 116.

The facts described below and in the accompanying documents show that the joint inventor Xin ZHANG cannot be found or reached after diligent effort.

As described in the accompanying statement of Qin FU and the exhibits thereto, named inventor Xin ZHANG left the employ of Huawei Technologies Co., Ltd. (assignee) more than three years ago, just after the priority Chinese application was filed.

A suitable inventor's declaration referring to the international patent application number was provided the undersigned's firm to counsel for Huawei, and was forwarded with a copy of the application to inventor ZHANG at his last-known address, but the package was returned unopened and marked by the postal service to indicate that Mr. ZHANG was not at the address and could not be found.

The accompanying statement of Qin FU also reflects the fact that public directories for residence addresses of individuals (*i.e.*, analogous to our White Pages) are not available in China. China has a population of over one billion persons, and apparently from the Google search results submitted herewith with the declaration of Yongli REN, the name Xin ZHANG is relatively common, making location of the present inventor quite unlikely even with resolute diligence. The declarants exhausted leads within the company, and found searches within Google unavailing.

The records of Huawei reflect that they were informed Mr. ZHANG was leaving to take employment with 3Com Corporation. Upon learning of this information and recalling that the inventor left Huawei over three years ago, the undersigned attorney conducted searches for published patents or patent applications in various public databases with which the undersigned attorney is familiar, with the hope of finding the subject inventor and a new address through public records. The searches were directed to published patents or patent applications naming Xin ZHANG as an inventor and 3Com as assignee or applicant. The searches produced no results.

As shown in Exhibit A hereto, a search was conducted in the worldwide database of the European Patent Office at ep.espacenet.com, and returned no results.

As shown in Exhibit B hereto, a search was conducted in the patent database of the U.S. Patent and Trademark Office and returned no results.

As shown in Exhibit C hereto, a search was conducted in the patent application database of the U.S. Patent and Trademark Office and returned no results.

As shown in Exhibit D hereto, a search was conducted in the database of the Chinese Patent Office at www.sipo.gov.cn (English-language interface), and returned no results.

The facts show that inventor ZHANG cannot be found or reached after diligent effort. Accordingly, the petition should be granted.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. §1001 and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Conclusion

On the basis of these facts and for the foregoing reasons, it is solicited that the U.S. Patent and Trademark Office grant a patent on this application to the inventors making the application, subject to the same rights which the non-signing inventor would have had if he had joined.

Should the Petitions Officer have any question of form or substance, he or she is encouraged to contact the undersigned attorney at the telephone number and address listed below.

Respectfully submitted,

Patent Search Help

The database provides two search modes: Quick Search and Expression Search.

§ Quick Search

There are six steps to using the Quick Search.

1. Enter a term in the text entry box labeled Term 1, for example, car.
2. Select which field to apply to Term 1 by using the Field 1 drop-down menu located to the right of the Term 1 box., for example, Title.
3. Select a Quick Operator (AND or OR) from the menu located between the two Term boxes.
4. Enter a term in the text entry box labeled Term 2, for example, engine.
5. Select which field to apply to Term 2 by using the Field 2 drop-down menu located to the right of the Term 2 box., for example, Abstract.
6. Click "Submit" button.

There is an example to search for “computer” in the title and for “IBM” in the applicant(s) name.

Type “computer” in the Term 1 box, then select Title from the Field 1 drop-down menu to the right of the Term 1 box. Then, enter “IBM” in the Term 2 box, select Applicant(s) Name from the Field 2 drop-down menu to the right of the Term 2 box, and select “AND” from the Operator drop-down menu. Click “Submit” button.

- **Notes**

1. If you want to search for a single term or expression, skip steps 1, 2, 6.
2. The search is not Case-sensitive. Searching for CAR and searching for car will produce the same results.
3. When a search query has been entered, the search results and a hit list of the 20 patents per page will be displayed, which is sorted ascending by application number.
4. For some terms, you must specify the field to search in to get the hits you expect. For instance, if you are searching for a application number or inventor name, you must select “Application Number” or “Inventor Name” from the “Field” drop-down menu. Searching the application number or inventor name in all fields will not retrieve hits in just this field, but rather anywhere in the body of the text.
5. If you are having difficulty searching for a specific field, please see the [Special Field Search Help](#).
6. You can use Boolean operators “and”, “or”, “not” as needed. When you enter a expression which is consisted by more than two words in the term box, you can use Boolean operators between them. Along with these operators, you can use parentheses to further clarify your search statement, for instance, “gas and (machine or engine)”. If you enter this query and select all fields from the Field drop-down menu located to the right of the Term box, you will retrieve all patents which contain both the terms “gas” and either “machine” or “engine” somewhere in the document.
7. The Quick Search allows you to use wildcard characters in search query.

The wildcard character “?” represents a single optional character. If you search for car?, you will retrieve words like car, card, care, etc.

The wildcard character “%” is placed at the end of the sequence, it will return all words beginning with the sequence. This is known as right truncation. If you search for car%, you will retrieve words like car, card, care, carry, carrying, etc.

Dear Sir:

I, Qin FU, hereby state as follows:

1. I am authorized by Huawei Technologies Co., Ltd. (hereinafter "Huawei"), the assignee of the above-identified patent application (hereinafter the "application"), to make this statement in my capacity as an employee of the Intellectual Property Department of Huawei. An assignment executed by each of the joint inventors, except for Mr. Xin ZHANG, demonstrating that Huawei is the assignee of the application is attached hereto as Exhibit A.

2. I make this declaration to provide a statement of facts known to me concerning the inventor, Mr. Xin ZHANG, and our inability to reach him for his execution of an inventor's declaration for the application. Mr. ZHANG is one of five joint inventors

Application No.: 10/566,952

Docket No.: 30952/41850

named on the application. The other four joint inventors, Xiaozheng GUO, Zhijian LU, Qingchen ZHU, and Youkun CHEN, have executed a declaration for the application for themselves and on behalf of the nonsigning joint inventor, Mr. ZHANG. A copy of a declaration signed by each of the joint inventors, except for Mr. ZHANG, is submitted herewith as Exhibit B.

3. At the time of invention of the subject matter disclosed and claimed in the application, Mr. ZHANG, like each of the other inventors, was an employee of Huawei and resided within a housing complex associated with Huawei. Mr. ZHANG's last known address is the address of the housing complex:

Huawei Administration Building
Bantian, Longgang District
Shenzhen
People's Republic of China
518129

4. Our employment records for Mr. ZHANG show that he left the company more than three years ago, on November 30, 2003, to work for 3Com Corporation.

5. On March 16, 2006, I attempted to send a copy of the application and declaration via registered letter to Mr. ZHANG at his last known address. The registered letter was returned to me unopened, with a notification from the postal service that the individual identified as the addressee, Mr. ZHANG, cannot be found. A copy of the front of the registered letter, with the notification affixed thereto, is submitted herewith as Exhibit C. An English language translation of the notification and address information on the registered letter is submitted herewith as Exhibit D.

Application No.: 10/566,952

Docket No.: 30952/41850

6. Upon receiving the returned letter and notification, several unsuccessful attempts were made to contact Mr. ZHANG.

7. Public directories of residence addresses for individuals do not exist in China, and there is generally no good publicly-available way to locate an individual who has moved. I am aware of no internet web sites for searching for an individual's address in China, and I could locate no such web sites.

8. Inquiries were also made with employees of Huawei who were Mr. ZHANG's co-workers at the time he was employed with Huawei. These inquiries did not result in a new address for Mr. ZHANG.

9. I have firsthand knowledge of the foregoing facts regarding the diligent efforts to locate Mr. ZHANG for his execution of the declaration.

10. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. §1001 and that such willful false statements may jeopardize the validity of the application or any patent issuing therefrom.

I am aware of no internet web sites for searching for an individual's address in China, and I could locate no such web sites.

4. However, in an effort to determine any further information regarding Mr. ZHANG's whereabouts, I performed searches on the Chinese portal and the UK portal (in English) for the Google web search engine. These efforts were also unsuccessful in determining further information regarding Mr. ZHANG's whereabouts. For example, a search for the inventor's name "ZHANG, Xin" returned 2,300,000 results on the Chinese portal, and about 1,320,000 results on the UK portal. Other attempts were made to narrow the results to relevant information, without success. The results of the searches (and English-language translations for the Chinese-language searches) are attached herewith as Exhibit A.

5. I have firsthand knowledge of the foregoing facts regarding the diligent efforts to locate Mr. ZHANG for his execution of the declaration.

6. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. §1001 and that such willful false statements may jeopardize the validity of the application or any patent issuing therefrom.
